

Actual Data Objects:

Customer: CustomerID, first_name, last_name, address, phone_Number, email, date_of_birth, age

Branch: name, address, asset

Loan: loan_Number, branch_name, amount

Borrower: Borrower_No, customer_id, Loan_Number

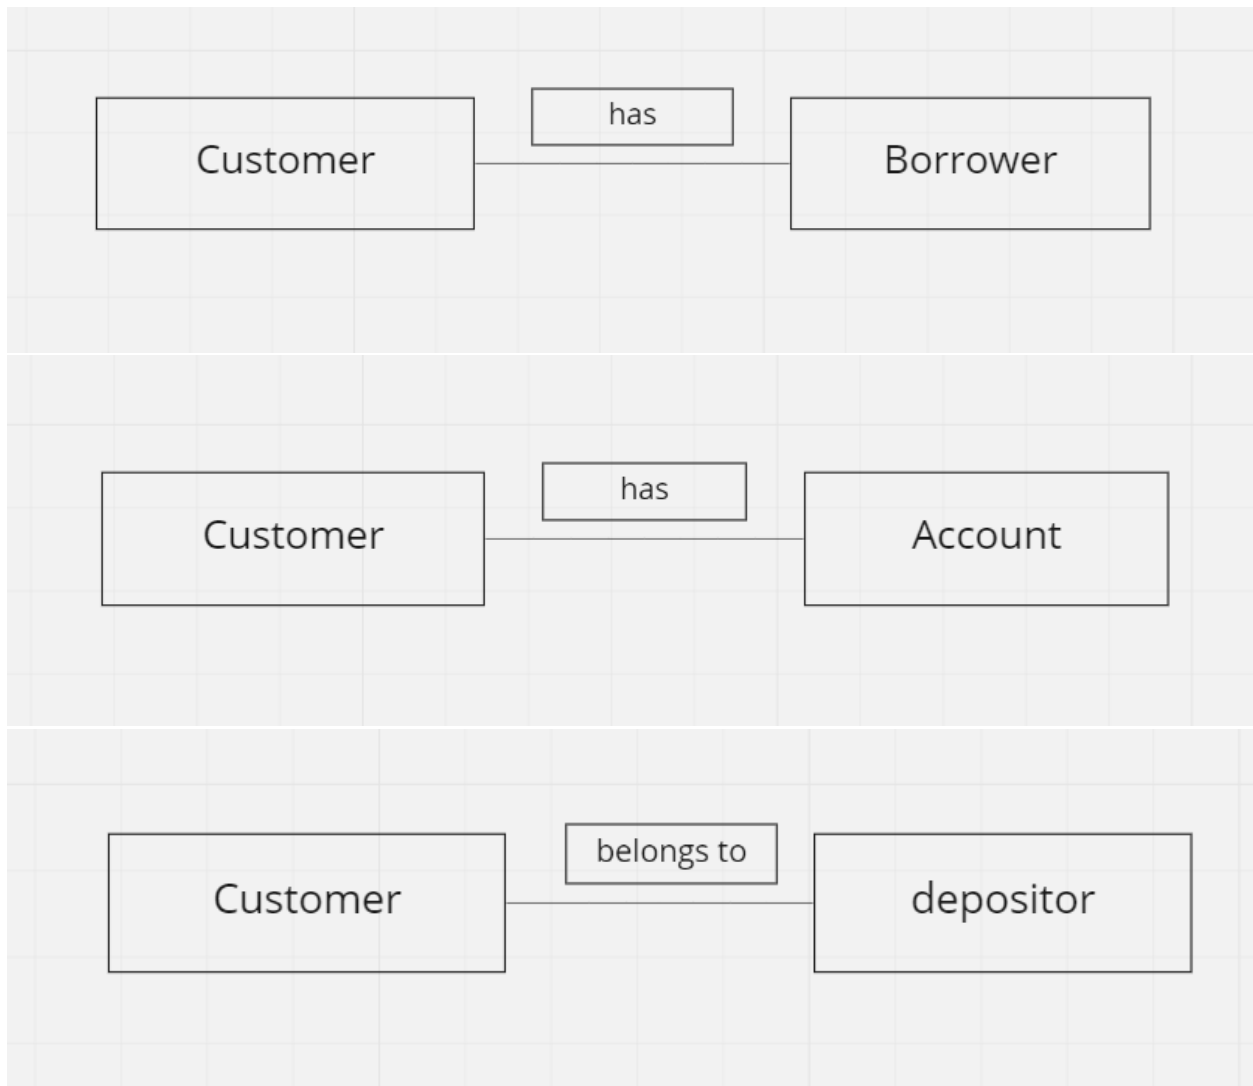

Account: acc_Number, customer_id, Branch_Name, Balance

Depositor: customer_id, acc_Number

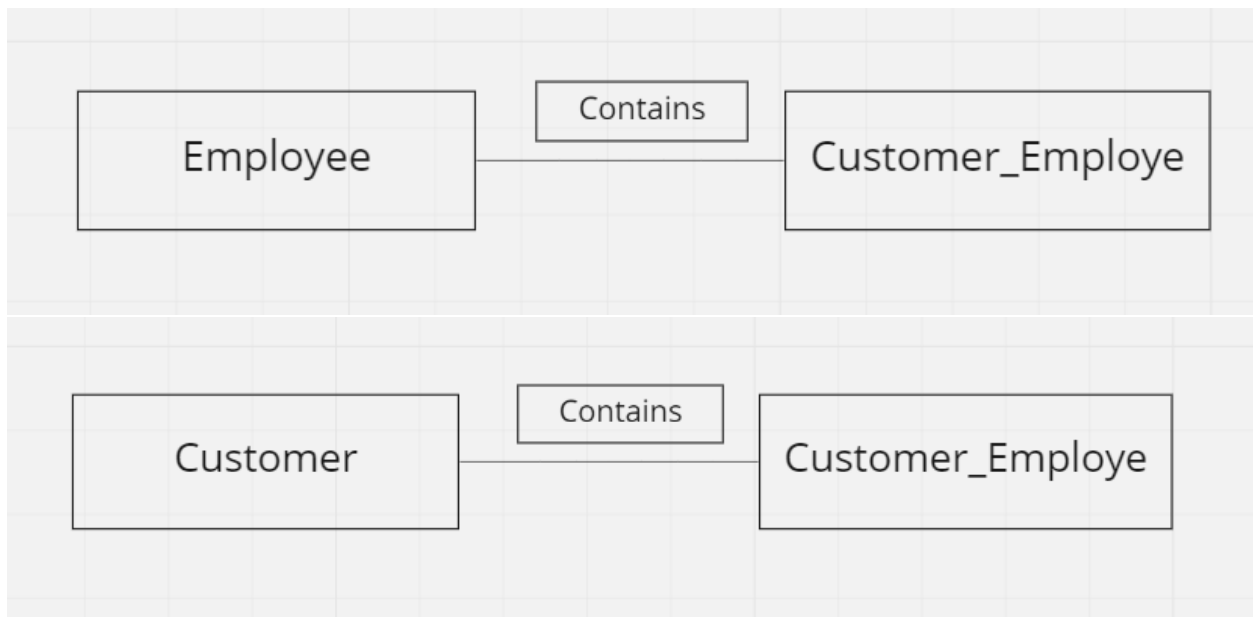

Employee: employee_Id, first_name, last_name, salary, address, blood_group, phone_number, email, date_of_birth, age

Customer_Employee: Customer_id, Employee_Id

Relationship among data objects:

Schema Table:

Key: AI: Auto Incremented ID

Table 1: Schema table for Customer

Customer		
Attributes	Types	Size
customer_id	number	AI
first_name	varchar	250
last_name	varchar	250
address	varchar	250
Phone_Number	number	11
email	varchar	250
Date_of_birth	Date-time	
age	number	3

Table 2: Schema table for Branch

Branch		
Attributes	Types	Size
name	varchar	250
address	varchar	250
asset	number	AI

Table 3: Schema table for Loan

Loan		
Attributes	Types	Size
loan_Number	number	6
branch_name	varchar	250
amount	number	AI

Table 4: Schema table for Borrower

Borrower		
Attributes	Types	Size
Borrower_No	number	AI
customer_id	number	AI
loan_Number	number	6

Table 5: Schema table for Account

Account		
Attributes	Types	Size
customer_id	number	AI
acc_number	number	AI
Branch_Name	varchar	250
balance	number	AI

Table 6: Schema table for Depositor

Depositor		
Attributes	Types	Size
customer_id	number	AI
acc_Number	number	AI

Table 7: Schema table for Employee

Employee		
Attributes	Types	Size
employee_id	number	AI
first_name	varchar	250
last_name	varchar	250
salary	number	10
address	varchar	250
blood_group	varchar	250
phone_Number	number	11
email	varchar	250
Date_of_birth	Date-time	
age	number	3

Table 8: Schema table for Customer_Employee

Depositor		
Attributes	Types	Size
customer_id	number	AI
Employee_ID	number	AI
